

The Next Generation of Refrigerant Leak Sealant

EasySeal® Direct Inject

Now made in the U.S.A., EasySeal Direct Inject is the strongest sealant on the market, with millions of leaks sealed. With this new injection system, pumping down the unit is a thing of the past. The concentrated formula means less material in the system. It is perfect for split systems, heat pumps, microchannel coils, packaged units, and mini splits. EasySeal Direct Inject is formulated to not plug cap tubes or expansion valves. EasySeal Direct Inject-UV is designed to seal leaks and also show where larger leaks are with the use of a UV light.

A/C EasySeal®

A/C EasySeal prevents and seals refrigerant leaks in residential and light commercial ACR systems. It is perfect for those hard-to-find and expensive-to-fix leaks and works with all refrigerants (except ammonia). It is easily installed with the reusable piercing valve and hose. A/C EasySeal circulates with the system's refrigerant, and if a leak should occur, it will quickly and permanently seal the leak and prevent the system from losing refrigerant and shutting down.
